Aroostook County— A recent Northern Maine Community College graduate is being honored by a professional association for her outstanding undergraduate work. The Maine Health Information Management Association (MeHIMA) is recognizing Lisa Jenkins of Presque Isle for attaining the highest grade point average for a graduate in the Health Information Management program at NMCC.

Jenkins graduated with an Associate in Applied Science degree in May with a 3.35 grade point average and hopes to begin working in this growing field. Jenkins was in the first class to graduate from this new program at NMCC.

Donna Humphrey, RN of St. Joseph Hospital in Bangor made the presentation June 3 at NMCC.

“The Maine Health Information Management Association, a component of a national association, promotes the responsible use of health information. The Association provides professional development and supports education for those who work in the health information field in Maine,” said Humphrey. “MeHIMA is proud to recognize the achievements of students like Lisa and we’re pleased to extend to her a warm welcome into this exciting career.”

Along with a framed certificate, Jenkins received a financial award.

Donna Humphrey, RN of the Maine Health Information Management Association (MeHIMA) awards NMCC graduate Lisa Jenkins of Presque Isle with a certificate of achievement and a financial award. MeHIMA honors graduating students with the highest GPA from Health Information Management programs in Maine.
