

**Northern Maine Community College  
Internet Service**

**Questions & Responses August 13, 2019**

Q1. We cannot get service in there before September 30. We'd be lucky to have a pole survey done by then.

**R1. Please include in your proposal the time frame for activation if you can't meet the September 30 deadline.**

Q2. Is the 1G replacing the 200M, or will you be keeping that as part of the overall Community College System contract, and are looking for diversity from that?

**R2. The 1G is in addition to our Community College System supplied 200M Internet connection. This will just be for Northern Maine Community College and will be separate from the System connection.**
