

Northern Maine Community College

Go! Green! Energy Challenge

Welcome interested parties,

If you are reading this letter, you may be thinking about competing in the first ever Go! Green! Energy Challenge at Northern Maine Community College.

If you decide to compete, and we hope you will, here are a few things you should know as you begin preparing for the competition.

1. **Prizes:** Equivalent of two full time tuition waivers or 30 credit hours for the winning team.
2. A presentation for interested parties will be offered on 11/13/08 at 12:00pm in the Edmunds Conference Center.
3. Be sure to pick up a packet containing the Go! Green! Energy Challenge information sheet, scoring guide, and “Intent to Compete” form. These may be picked up from Heidi Smith, Chuck Kelley or from the College relations office just off the Christie lobby.
4. Please have all of your team members sign the Intent to Compete form and return to Chuck Kelley beginning on November 21st and no later than December 12th.
5. The projects may include, but are not limited to, any of the following: weatherization, transportation, facility improvements, electrical energy reduction, procedural changes and energy awareness campaigns.
6. You may choose any NMCC student to work on your team and cross-program participation is encouraged.
7. Remember to have a good time and that changes you and your team suggest will benefit the entire college community!

Good Luck,

Go! Green! Staff
